OVERVIEW

The space-saving design of the ServSwitch™ DT Pro with Audio eliminates desktop clutter in small office/home office (SOHO) environments.

The ServSwitch DT Pro with Audio is simple to use. Select CPUs by hotkeys or front-panel push buttons. Front-panel LEDs make the active port easy to identify. The AutoScan function enables port scanning at 10-second intervals, making computer monitoring easy and hands free.

In addition, the ServSwitch DT Pro with Audio displays all standard VGA resolutions from 640 x 480 to 2048 x 1536. It supports standard keyboard layouts with up to 104 keys and Microsoft® IntelliMouse® or compatible mice.

Audio and USB peripheral support makes the switch ideal for multimedia environments. It's great for desktop users requiring access to multiple computers with audio. And it enables USB 2.0 peripheral switching, too.

Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

Recognize any of these situations?

• You wait more than 30 minutes to get through to a vendor's tech support.

• The so-called "tech" can't help you or gives you the wrong answer.

• You don't have a purchase order number and the tech refuses to help you.

• It's 9 p.m. and you need help, but your vendor's tech support line is closed.

According to a survey by *Data Communications* magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important when choosing a vendor. But even though network managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls far short of their expectations—and certainly isn't worth what they paid.

At Black Box, we guarantee the best value and the best support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don't waste time and money—call Black Box today.

TECH SPECS

Operating Systems Supported — Windows® 98 SE/Me/XP, Windows 2000
Resolution (Maximum) — 2048 x 1536 at 85 Hz
Connectors —
    KV7010A:
        CPU: (2) HD15 F;
            USB peripherals: (2) Type A F;
            Audio/microphone: (4) 3.5-mm jacks;
            Flash: (1) 8-pin mini DIN F;
        Console:
            Keyboard and mouse: (2) USB Type A F;
            Monitor: (1) HD15 F;
            Audio/microphone: (2) 3.5-mm jacks;
    KV7011A:
        CPU: (4) HD15 F;
